

# The Man Behind the Mind

NYX-G STORE, founded in 2021 by Askar Hussain — a self-taught tech enthusiast from Kerala — began with a simple yet powerful vision: to make custom PCs accessible to everyone, regardless of budget. Unlike many companies that focus solely on profit, Askar believed that every individual deserves a system built specifically for their needs and future goals.

Since its inception, NYX-G STORE has delivered over 1000+ custom PCs and mining rigs, tailored to meet the performance needs and budgets of students, gamers, developers, and editors.

At NYX-G, we don't just sell hardware — we help you understand it, ensuring your investment is smart, scalable, and truly yours.
